To begin installation, shut down your computer.

Connect the Comwave Internet Modem using the cable connection.

Connect the supplied Ethernet Cable from the LAN port of the Comwave Internet Modem to your computer.

(For Home Phone) Connect the supplied Ethernet cable from the LAN port of your Comwave Internet Modem to the WAN port of the Home Phone Adapter.

Connect the Comwave Internet Modem to a power outlet.  
Note: Wait until the LED Light Indicators on your Comwave Internet Modem indicate that the Modem is operational. This may take up to 5 minutes.

(For Home Phone) Connect a telephone to the PHONE 1 port on the Home Phone Adapter.

Connect the Home Phone Adapter to a power outlet and wait 5 minutes for dial tone. DO NOT DISCONNECT POWER as it may damage the Home Phone Adapter.

Start your computer. You should be able to browse the Internet instantly.

Test your phone line, you should have a dial tone and be able to make calls.

---

**Can’t access the Internet?**

1. Unplug the power to your Comwave Internet Modem, Home Phone Adapter and shut down your computer.

2. Wait 30 seconds and then plug your Comwave Internet Modem’s Power Cord back into the power outlet.

3. Wait until the LED Light Indicators on your Comwave Internet Modem indicate the Modem is operational. This may take up to 5 minutes.

4. Start your computer and plug in the Home Phone Adaptor into a power outlet.

5. Open your browser and start surfing the Internet. Check for a dial tone.

6. Still unable to surf the Internet? Call us at 1-866-210-9149.

We’ll get you back up online!
To log into your Wi-Fi, use the default login information found on the “STOP” sticker on the back of your modem.

To change your default Wi-Fi User Name and Password make sure your computer is connected via the Ethernet Cable to your Comwave Internet Modem.

CAUTION
Your Comwave Internet Modem is already Wi-Fi enabled by Comwave. We do not recommend making any changes to the default settings. Only advanced users should attempt to make changes or shut off the Wi-Fi settings by following the steps below.
3. Open your Internet browser and type http://192.168.0.1 in the address bar.

4. Enter your User Name: <blank> and Password: “admin”. Click OK to proceed to the Comwave Internet Modem Administration screen.

5. Click on Wireless in the top menu.

6. Click on Primary Network in the left menu.

7. Use caution when making the following changes:
   i. Disable your Wi-Fi Primary Network
   ii. Change your Network Name (SSID)
   iii. Change your Security Type
   iv. Choose your Wireless Key

8. Click Apply.
