

“

## Are you getting the Quality of Service you need from your provider of Wholesale SIP Trunking?

”

### *Carrier Class SIP Trunking from Comwave*

In a survey conducted by Infonetics Research, over 90% of respondents cited “reliability” was their top criteria in choosing a SIP trunking provider over cost. The VoIP reseller and carrier space continues to grow at a staggering pace with Hosted PBX providers, IT Integrators, Prepaid Calling Card Companies and resellers alike. The challenge that all of these providers have encountered over the last few years is reliability and quality of service. A reliable, flexible and cost effective service is what made Comwave Canada’s leader in VoIP and SIP trunking and voted this year’s #1 consumer’s choice for business excellence.

As a premium VoIP provider, Comwave has a proven

history of uninterrupted SIP Trunking access. Comwave places significant emphasis on network stability and has gone to great lengths to build multiple levels of redundancy within its carrier network. Comwave has invested heavily in the best carrier class hardware and software to ensure an unprecedented level of service to its wholesale customers.

With emphasis on Wholesale SIP Trunking and DID Provisioning, Comwave’s Network spans all of Canada with reach to over 96% of the Canadian population all on a single aggregated SIP Channel.

While most SIP Trunking providers put cost savings in the forefront when promoting their services, Comwave Carrier Services delivers Network Availability and Quality of Service at very competitive rates.
